QUEST ENTERPRISE SERVICES

Smarter management for today's provider networks.

Quest Analytics offers the **first and only network management platform** designed to measure variances in adequacy and accuracy together—simultaneously—at the network and directory levels, where you get audited.

Measure Adequacy

Quest Enterprise Services measures network adequacy exactly the way regulators do—because CMS and many states use our tools in their audits, it finds the same gaps they would find.

Measure Accuracy

Directory accuracy is measured by leveraging our National Database of primary-sourced, continuously updated provider data, along with other industry-known sources of truth. Letting you know what's right, wrong and missing from your provider data allows you to focus resources and prioritize efforts on remediating the inaccuracies with the most impact.

Manage & Monitor Together

And when you can measure these key performance indicators, you can finally manage them, efficiently, using powerful new tools to close adequacy gaps and correct provider directory accuracy issues. You can monitor performance over time to guide your management efforts.

The result is not just compliant networks, accurate directories and better member experiences; it's a stronger, smarter and more competitive organization overall.

ACTIONABLE INSIGHTS ACROSS THE ENTERPRISE

Enterprise-wide management means more than connecting silos and streamlining the workflow.

It means giving everyone in your organization, regardless of product line or job function, access to the tools and insights they need to work more intelligently and more proactively.

And it means for the first time being able to ask—and answer—fundamental questions that will transform the way you work.

BETTER DATA | BETTER NETWORKS | BETTER MEMBER EXPERIENCES
This is your network under new management. **This is Quest Enterprise Services.**

ADEQUACY + ACCURACY IN ONE PLATFORM

We measure adequacy and accuracy the way regulators do – because **the Centers for Medicare and Medicaid Services use our tools too.** We use the same standards and specialties to measure compliance as CMS and we update them annually in accordance with their release.

Our services across business lines include:

“Inaccurate provider directories ... bring into question the adequacy and validity of the Medicare Advantage Organization’s provider network.”

–CMS 2020 Announcement

MEDICARE ADVANTAGE

Provider Data Management Services

Validate your provider network data, while tracking and trending your progress over time.

Accuracy Services

Measure and monitor your network accuracy score, identify what’s right, wrong and missing within your data, and remediate the inaccuracies at a provider level.

Opportunity Analysis

Identify where you may be able to expand into other counties with minimum effort and the greatest potential return on your investment.

Membership Analysis

Model and assess your network using your own member data, in addition to the beneficiary file. Also, prioritize filling deficiencies based on the amount of membership at risk.

Impact Analysis Services

Fill your gaps more efficiently with a lens into which providers are available in the market as well as within your other lines of business and their impact on your network adequacy by geography and specialty.

Client Services Support

Receive access to a dedicated Quest Analytics Consultant.

Adequacy Compliance Monitoring Services

Measure and monitor your network adequacy score in real-time shared across your organization.

Termination Analysis

Create value-based or tiered networks with better modeling while improving your strategic understanding of how current and future provider contracts impact your network adequacy.

Custom Client Fields

Assess building a high-quality network that continues to meet network adequacy utilizing metrics on network/prospect providers that you want, such as quality, utilization fields or cost & efficiency data.

NPI Certification Date

CMS encourages providers to verify their information in NPPES, and has stated that health plans will receive safe harbor if their directory data matches the information in NPPES. We display this verification date within the QES adequacy analysis.

COMMERCIAL SERVICES

You're able to measure, monitor and manage more than 80 specialties, including pediatrics, dental, vision, hearing, behavioral health and additional ancillary services. To help you ensure your members have adequate access to care, our commercial services include:

Competitive Advantage RFPs

Provide brokers and consultants a real-time view into your commercial product adequacy and provider data accuracy on an ongoing basis.

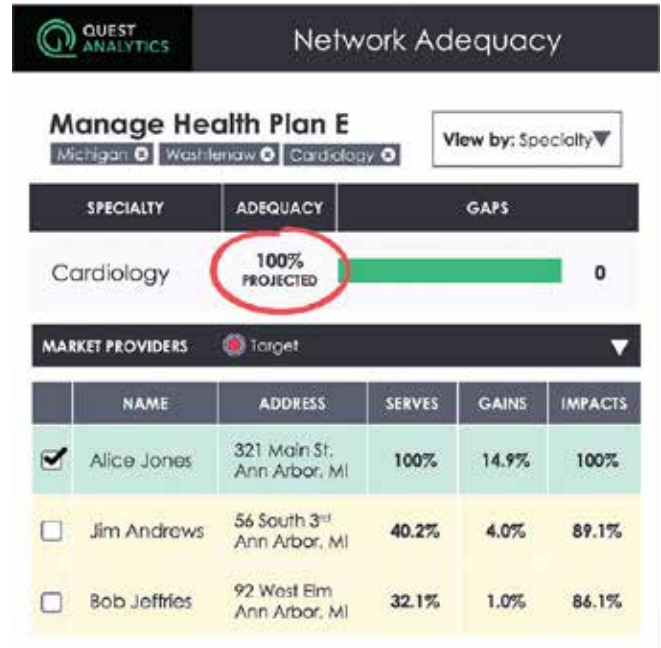

Network Performance Trending

Respond to accreditation agency requests, such as NCQA and URAC with confidence by demonstrating an ongoing process and providing a real-time view into network performance overtime.

This is your network under new management.
